Version 1.0	11/11/14	Initial release	Ryan Johnson

Document Storage

This document and other project documents are stored on GitHub at:
FDIC# - Project Documents

Document Owner
Ryan Johnson is the main author and contributor of this document.

Purpose and Scope

This document outlines the results of test cases for the application, *Idea Engine,* per the test requirements outlined in FDIC# - Testing v1.pdf. Each test case corresponds to a tested feature of the application.

This document is a detailed extension of the Project Plan Document Section 5.2.

Each defect found in the system creates an Incident. The Incident resolution is completed when all requirements of the Incident Resolution guidelines are met per document FDIC# - Test Specification - v1.pdf

Incident Template

All reported defects will utilize this Incident Template form:

Incident ID	INC-<test case ID#>
Description	<Short description of the defect>
Originator	<name of person submitting Incident>
Discover Date	<date defect discovered, in MM/DD/YYYY date format>
Severity	<low, medium, high>
Steps reproduce defect	<detailed steps to reproduce defect>
Responder	<developer working issue>
Current Status	<open, working, resolved>
Cause	<Incident cause. If unknown, then TBD>
Resolution	<Incident resolution. If not resolved, then TBD>
Addressed Date	<date defect resolved, in MM/DD/YYYY date format>
Creation Phase	<phase defect introduced>
Detection Phase	<phase defect discovered>
Correction Time	<time from open to working, plus time working to resolved>

Incidents

There are no reported Incidents at this time
